

# Footwear Closure Type

## Purpose

- The purpose of the footwear prediction through ML is to reduce the time taken manually to update this information in template for each product.
- prediction is based on product type and category related valid values.

## Closure Type

- The closure type of a footwear is the way it is fastened. Mostly it is attached to the heel of the shoe. It can be a buckle, lace-up etc.
- The following are the types of closure :
  - Slip On Closure (Men/Women)
  - Lace-up Closure (Men/Women)
  - Buckle Closure (Men/Women)
  - Zip Closure (Men/Women)
  - Hook & Loop Closure (Men/Women)
  - Back Strap Closure (Women)

### SLIP ON CLOSURE :

Slip on closure means having no fastenings. Therefore able to be put on and taken off quickly.

#### Women

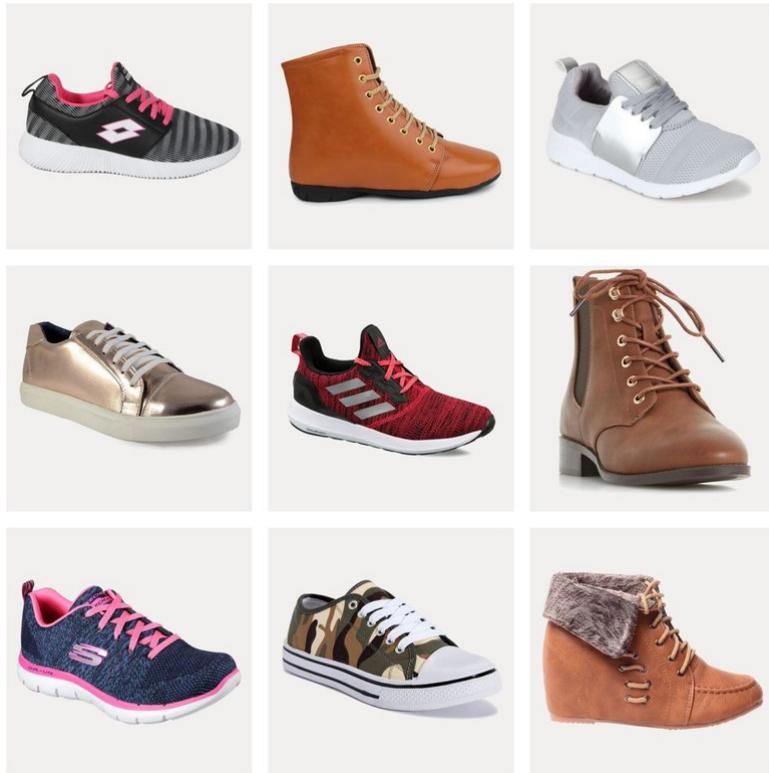

Men

**LACE-UP CLOSURE :**

Lace-up closure means to be fastened by laces. Lace is a cord or leather strip passed through eyelets or hooks on opposite sides of a shoe and then pulled tight and fastened.

**Women**

Men

**BUCKLE CLOSURE :**

To be fastened by a buckle. A buckle is a device used for fastening two loose ends, with one end attached to it and the other held by a catch in a secure but adjustable manner.

**Women**

**Men**

**ZIP CLOSURE :**

A fastening device operating by means of two parallel rows of metal or plastic teeth on either side of a closure that are interlocked by a sliding tab. Also known as a zip.

**Women**

Men

**HOOK & LOOP CLOSURE :**

Hook-and-loop fasteners consist of two components: typically, two lineal fabric strips which are attached to the opposing surfaces to be fastened.

**Women**

**Men**

**BACK STRAP CLOSURE :**

A pull strap attached to the top of the backstay of a shoe or boot. This closure type is applicable only for women.

**Women**

As all the closure types are widely different from each other, there should be no difficulty to train the machine learning tool.
